**EXCLUSIVE QLF INAUGURAL PROMOTION!

On behalf of QLF, let me share some very exciting news. We are partnering with Adventure Canada, the preeminent adventure travel company in Canada. Our partnership will explore the Canadian High Arctic in 2019. There is no better organization to introduce QLF Alumni and friends to the roof of North America—and no better time at which to do so as the Arctic continues to change at an unprecedented rate.

Adventure Canada has been offering trips of a lifetime for more than three decades. They know how to do it right. We have worked together in the past and share friendships with many of the professionals familiar with this geography. We offered some programming together in Newfoundland in the early 2000s and are confident that the fit is a good one. We are proud to be working with Cedar Swan, Adventure Canada's CEO, to make this offer possible.

For over half a century QLF has been defined through our unique approach of working across borders in community-based conservation. We now share our operational model in North America with other regions around the world. Environmental issues—large and small—cannot be addressed without making sure that the solutions include people. QLF has always promoted the potential of individual initiative and leadership—that one person can make a difference. QLF taps the energy and commitment of university Interns and young professionals worldwide to provide experiential training opportunities for the next generation's leaders.

The creative partnership between QLF and Adventure Canada will support our ongoing mission. QLF members will have the opportunity to explore environmental and social issues at a region experiencing the forefront of climate change. We'll learn together and equip ourselves to be ambassadors for the regions that need international attention. Your participation will also benefit QLF: a portion of your tour fare will go directly back to QLF.

Please join us on the QLF High Arctic Explorer expedition in 2019. This expedition and partnership with Adventure Canada will be part of the lead-up to our 60th anniversary year in 2021.

QLF Conservation Internships in Newfoundland and Labrador

QLF is delighted to finish 2018 on a high note as we conclude the 40th season of the Conservation Internship Program. This year's exceptional student Interns from U.S. and Canadian universities have benefited from their field experience in New England and Eastern Canada and now join QLF's family of 5,000 Alumni.

Alongside QLF Senior Consultant, Dr. Kathleen Blanchard (right), 2018 Conservation Interns conduct a survey of nesting black-legged kittiwakes off Conche, Newfoundland.

It is the unique combination of these experiences that has proven effective in developing the next generation of conservation leaders by providing practical skills and knowledge of best conservation practices beneficial throughout their professional careers.

QLF Internships are supported by Adventure Canada's Discovery Fund when you join High Arctic Explorer. In addition, you will have the company of a QLF Intern as a guest Scientist in Residence alongside QLF President Beth Alling aboard *Ocean Endeavor* in 2019.

DAY 1 | OTTAWA

Ottawa is the gateway to the North. Canada's capital city is a dynamic hub of activity with the population hovering just around one million. Home to impressive national sites, landmarks, and some of the country's best collections about the Arctic. We'll stay in the Historic Chateau Laurier by the Rideau Canal (a UNESCO World Heritage site) and gather in the afternoon for a visit to the Museum of Nature to explore the Arctic exhibit followed by a cocktail reception with Arctic inspired fare.

DAY 2 | QAUSUITTUQ (RESOLUTE BAY)

Qausuittuq, or "place with no dawn," is named for its dark winters. But in summer, the sun persists constantly from about April 29 to August 13 each year. The community's English name, Resolute Bay, honours the HMS *Resolute*.

"Resolute" also describes local Inuit who were relocated, in 1953, from Inukjuak, Québec, and Mittimatalik by the Canadian government. Our early morning charter flight will bring us to Qausuittuq, where we will embark the *Ocean Endeavour*.

Adventure Canada itineraries may be subject to change without notice due to weather, ice, and sea conditions.

DAY 3 | BEECHEY ISLAND

In 1845, Sir John Franklin set out from England with HMS *Erebus* and *Terror*, attempting to sail through the Northwest Passage. Franklin's party overwintered at Beechey Island where three of his men died.

Numerous search parties later used Beechey as a depot and rendezvous. Amundsen, Bernier, and Larsen all visited Beechey. Thomas Morgan of HMS *Investigator* was buried there in 1854 alongside Franklin's men. The graves and the ruins of Northumberland House are a haunting memorial.

DAY 4 | DEVON ISLAND

Devon Island is the largest uninhabited island on Earth at over fifty thousand square kilometres. The island's geology is stunning, and very visible as we sail the coast. Flat topped mountains, glacial valleys, and a substantial ice cap give Devon Island its unique character.

Devon Island has a rich human history, and boasts historical and archeological features. We'll also be on the watch for wildlife.

DAY 5 | TALLURUTIUP IMANGA (LANCASTER SOUND)

We will spend the day exploring the ocean wilderness of Tallurutiup Imanga (Lancaster Sound). In August of 2017, this enormous body of water was declared a National Marine Conservation Area.

Large populations of marine mammals, including narwhal, beluga, and bowhead whales transit and feed in this area. There is a great selection of landing sites available to choose from, depending on weather, wildlife, and sea conditions.

DAY 6 | NORTH BAFFIN ISLAND

Today will be an expedition day in the truest sense as we explore northern Baffin Island's mountainous fjords. Weather, ice, and opportunity will determine our route among the spectacular geology. Expert spotters will be on deck, searching for seabirds, including thick-billed murre and kittiwakes. We'll also watch for marine mammals and scan the shores for muskoxen, caribou, and bears.

DAY 7 | MITTIMATALIK (POND INLET)

Mittimatalik is a bustling Arctic community in a beautiful setting. The views of nearby Bylot Island are stunning. We will have a chance to explore the town, including its excellent library and other facilities.

A cultural presentation at the Community Hall is not to be missed—arts and crafts may be available here, too. The Northern and Co-op stores offer a unique perspective on life in the Arctic, and sometimes have carvings as well.

DAY 8 | AT SEA — DAVIS STRAIT

Our onboard presentation series will continue as we steam across Davis Strait towards Greenland. Our expedition team will deepen your understanding of the Arctic as we go! This is an excellent time to enjoy workshops and group learning, watch a documentary, or dive into our library.

While out on deck, keep your binoculars ready for minke and humpback whales amid potential pack ice, as well as the seabirds that are sure to mark our passage.

Adventure Canada itineraries may be subject to change without notice due to weather, ice, and sea conditions.

DAY 9 | WESTERN GREENLAND

Greenland's west coast is simply stunning. An expedition stop in this area will offer many outstanding features of interest. Hikers, walkers, photographers, and contemplators will all be equally delighted. From mighty mountains to the tiniest tundra flowers, we will have much to explore.

DAY 10 | UUMMANNAQ FJORD

Uummannaq Fjord in northwest Greenland is the country's second-largest system of fjords. It is considered Greenland's sunniest place. A favourable climate—coupled with proximity to coastal travel routes—has made the fjord system a popular destination for Greenlandic Inuit.

The region has been settled for thousands of years. The famous 'Greenland mummies' dating to the 1400s were found in Qilakitsoq, near the town of Uummannaq, perched on the slopes of a heart-shaped mountain.

DAY 11 | ILULISSAT

Ilulissat translates literally into "iceberg", an apt name for this site at the mouth of the Ilulissat Icefjord—a UNESCO World Heritage Site. The icefjord is the outlet of the Sermeq Kujalleq Glacier, source of many of the icebergs in the North Atlantic.

Here, we will cruise in our fleet of Zodiacs to appreciate the icebergs. We will also visit the bustling town of Ilulissat, with its museums, cafes, craft shops, and busy fishing harbour.

DAY 12 | SISIMIUT COAST

People have lived in the Sisimiut area for 4,500 years. For the first 2,000 years, the people

of the Saqqaq culture occupied the area. Approx. 2,500 years ago, new people brought the Dorset culture to the Sisimiut area. They lived here for 1,500 years and were followed by the people of the Thule culture—the ancestors of the current population. All these cultures came from Canada. The people primarily lived on fish, birds and mammals such as whales and seals. The ice-free conditions in the sea around Sisimiut, including some of Greenland's deepest fjords, allow us to sail in waters that are home to many whales and seals.

DAY 13 | KANGERLUSSUAQ

Sondre Stromfjord is one of the longest fjords in the world and boasts 168 kilometres of superb scenery. We end our adventure by sailing up this dramatic fjord as the sun rises to greet us.

Kangerlussuaq, the town at its eastern head, is a former US Air Force base and Greenland's primary flight hub. Here, we will disembark the *Ocean Endeavour* and transfer to the airport for our return charter flight.

Adventure Canada itineraries may be subject to change without notice due to weather, ice, and sea conditions.

ACTIVITY LEVEL

Adventure Canada endeavours to accommodate all passengers, subject to the specific itineraries and terrain of our excursions, vessels characteristics and accommodations. Adventure Canada tours necessitate that passengers be in reasonably good health. Zodiac cruises and transfer times can be lengthy. You must be able to climb stairs between decks on the ship. You must also be able to climb the external gangway stairs to transfer between the ship and the Zodiacs. Our expedition team and ship crew are available to assist you in and out of the Zodiacs, both on shore and at the gangway. Adventure Canada expeditions may involve extensive walking in variable weather conditions over sometimes sandy or uneven terrain. Wherever possible while on shore excursions, we break into smaller, guided groups according to interest and physical ability. This may mean one small group going off on a strenuous, two-hour hike on steep terrain, while another explores the area in and

around the landing beach, keeping to relatively level terrain and short distances. Generally speaking, once a few people are ready to return to the ship, the Zodiacs are usually available to take you back at the time of your choosing. To inquire about whether our adventures are suitable for you, please do not hesitate to contact us.

SPECIAL ACCOMMODATIONS

Adventure Canada is committed to extending a high level of customer service to all travellers, including people with disabilities. At the time of booking please contact our Client Services Team to discuss your needs.

ZODIAC CRAFT

Zodiacs are the favoured means of transportation for ship-board expeditions and, indeed, wherever shallow waters and beaches ring the shoreline. They are stable, versatile craft that cruise at approximately four knots; in windy weather they can make for rather splashy rides. Wet gear is essential for any Zodiac tender, and Zodiac drivers are authorized to refuse embarkation to anyone inappropriately attired. Life preservers are absolutely compulsory and will be provided. Zodiac landings will generally entail disembarking onto rocky or gravelly beaches. The beach landings may be wet, meaning that there may be some spray en route to shore, and that you may have to step into water up to 25 centimetres / 10 inches deep.

MEDICAL FACILITIES

Passenger safety is of utmost importance to us. This expedition is intended for persons in good health, and thus our tours may not be suitable for those who are not fit for long trips for any reason, including disability, heart, or other health conditions. Should any such condition become apparent, or should passenger safety become a concern, we reserve the right at our sole discretion to decline embarkation prior to the commencement of the tour or to disembark passengers prior to the completion of the tour. Our vessel is not equipped to handle serious medical conditions. Medical and Emergency Evacuation insurance is mandatory. If you require specific medications, please ensure that you bring a supply adequate to last you for the duration of the journey and take care to properly pack them to ensure safe transport. Once aboard ship, we will be travelling in remote communities where prescriptions cannot be replaced. Select vessels have an onboard doctor; should you require the doctor's services, a consultation and treatment fee will apply. Any charges will be debited from your onboard account. To inquire about whether our tours are suitable for you, please do not hesitate to contact us.

GRATUITIES

Adventure Canada expedition team and guides do not accept tips.

The procedure for providing a gratuity may differ from tour to tour. Your host will outline this on each tour.

Our ships' crew work hard to please, and tips are appreciated. In fairness to all those who work together to make your trip enjoyable, tips are collected at the end of the voyage and distributed equitably among the crew. Although we leave tip amounts to your discretion, past passengers have asked for a recommended amount. We suggest a rate of \$15 USD per day, per passenger.

AIRFARE

When purchasing your airline tickets to meet us at our point of departure, please ensure that they are changeable or refundable; Adventure Canada is not responsible for missed connections due to late charter flights or changes / delays / interruptions in the ship's intended itinerary and will not reimburse you for rebooking fees or new ticket charges incurred.
